- Introduction to Part 3
- Official Images and trust
- Deployment pipelines
- Using a non-root user
- Optimizing the image size
- Multi-host environments
- End

End

Remember to mark your exercises in the [submission application](#)! Instructions on how and what to submit are on the [getting started page](#).

ECTS Credits

Enrolling after each part is required for the ECTS credits. Now that you have completed part 3 use the following link to enroll in this course:

- DevOps with Docker: security and optimization, <https://www.avoin.helsinki.fi/palvelut/esittely.aspx?s=otm~487d8dd8-3a4b-447a-9118-47bfff8169b6>

NOTE!

- Enrollment for the course through the Open University is possible until June 16th, 2024.
- Credits for the course are only available to those students who have successfully enrolled in the course through the Open University and have completed the course according to the instructions.
